	Operator Crane.Licence.Slewing mobile crane greater 100T																																																
	Operator Crane.Licence.Operate a vehicle loading crane > 10T																																																
	Operator Elevated Work Platform.High Risk Licence.Boom-type elevating work platform (WP)																	M						M																									
	Operator Elevated Work Platform.Qualified.Operate boom EWP (required for boom length >11m)																	O																															
	Operator Excavator.Licence.Civil Construction Excavator																				M																												
	Operator Forklift.High Risk Licence.Licence to operate a forklift (LF)																				M																												
	Operator Truck.Licence.Dump Truck Operations													O	M																																		
	Operator Truck.Licence.Tip Truck Operations																																																M
	Operator.Qualified.Direction Drilling												M																																				
	Operator.Qualified.Driller's Licence – Class 1, 2 or 3 (only required for waterwell drilling)																																																

Notes:
M* = Must hold the machine specific competency or licence relevant to operations and/or state based requirement.
* = Must hold Workcover / Worksafe High Risk License for Task.
(1) = Must hold the appropriate trade or licence for tasks being conducted.
(2) = Must hold one of the UOC depending on machine size i.e. over/under 10T.
= Conditional operator requirement.
The information contained in this matrix is for reference only and could be subject to change from the Rail Transport Operators.

National Plant Matrix

Licencing Details

High Risk Roles	NON High Risk roles
National - Dogman	National - Bobcat/Skid Steer
National - Elevated Work Platform Operator>11M	National - Dozer
National - Forklift Operator	Drilling Rig Operator - Air - National
National - Mobile Plant Operator (concreting) (note: class code PB Concrete-placing Boom Operation)	Drilling Rig Operator - Auger - National
National - Operator Crane/Hiab>10T	Drilling Rig Operator - Core - National
National - Operator Non-slewing mobile cranes (>3T)	Drilling Rig Operator - Rotary Mud - National
National - Operator Slewing Mobile Crane >100T	Drilling Rig Operator - Cable Tool - National
National - Operator Slewing Mobile Crane up to 100T	Drilling Rig Operator - Directional Drilling - National
National - Operator Slewing Mobile Crane up to 20T	National - Dump Truck
National - Operator Slewing Mobile Crane up to 60T	Dump Truck - NSW Only
National - Rigger	National - Elevated Work Platform Operator<11M
National - Scaffolder	National - Excavator Operator
National - Telehandler Non-slewing >3T	National - Front End Loader Operator
National - Telehandler Slewing >3T	National - Grader Operator
National - Backhoe Operator	National - Operator Crane/Hiab<10T
	National - Roller Operator
	National - Telehandler <3T
	National - Tip Truck

High Risk Licences
Erect and dismantle restricted height scaffolding
Licence to erect, alter and dismantle scaffolding - advanced level.
Licence to erect, alter and dismantle scaffolding - intermediate level.
Licence to erect, alter and dismantle scaffolding- basic level
Licence to operate a non-slewing mobile crane (greater than 3 tonnes)
Licence to operate a slewing mobile crane (over 100 tonnes)
Licence to operate a slewing mobile crane (up to 100 tonnes)
Licence to operate a slewing mobile crane (up to 20 tonnes)
Licence to operate a slewing mobile crane (up to 60 tonnes)
Licence to operate a vehicle loading crane (capacity 10 meter tonnes and above)
Licence to perform dogging (DG)
Licence to perform rigging advanced level (RA)
Licence to perform rigging basic level (RB)
Licence to perform rigging intermediate level (RI)

National Plant Matrix

Role examples (A-Z)

NOTE: These are to be used as a guide only. If you are unsure which role applied to you, please seek clarification from the operator with whom you propose to work as to what role is required for your intended duties. It is the individual's responsibility to ensure that the appropriate role is held before work is carried out.

Role	Examples
Civil Mobile Plant Operator	Mobile plant operators drive and operate heavy machinery used to level, excavate, load and move earth, rock and other material.
Rail Bound Plant Operator	Track maintenance machines or items of plant which under normal conditions cannot be removed from the track
Road-Rail Plant Operator	A rolling stock vehicle which can operate under its own power, both on and off rail, and which can transition from one mode of operation to the other. Road rail vehicles may or may not have the ability to travel on a public highway, and may or may not be road registered.
Drilling Rig Operators - AIR	utilise rigs that use compressed air as a fluid to carry out drilling activity in a range of contexts which could include blast hole drilling, sonic drilling, mineral exploration, piling, construction and maintenance of water wells. * Waterwell contractors will also require a card/licence issued by Government or industry organisation. The Waterwell card or licence must identify a Class of licence (Class 1, 2 or 3).
Drilling Rig Operators - AUGER	utilise auger rigs to carry out drilling activity in a range of contexts which could include site investigation and sampling, geotechnical work, waterwell construction or maintenance, environmental sampling; piling, pier and foundation work. * Waterwell contractors will also require a card/licence issued by Government or industry organisation. The Waterwell card or licence must identify a Class of licence (Class 1, 2 or 3).
Drilling Rig Operators - CORE	utilise rigs to carry out drilling activity in a range of contexts which could include mineral exploration, coring underground in areas of confined space, geotechnical drilling, taking core samples, some construction work.
Drilling Rig Operators - ROTARY MUD	utilise fluid-powered rigs to carry out drilling activity in a range of contexts which could include drilling water bores and monitoring bores, or in environmental and mineral exploration sectors. * Waterwell contractors will also require a card/licence issued by Government or industry organisation. The Waterwell card or licence must identify a Class of licence (Class 1, 2 or 3).
Drilling Rig Operators - CABLE TOOL	utilise cable tool rigs to carry out drilling activity in a range of contexts when working in soft, sedimentary rock formations which could include site investigation or sampling, for the geotechnical, mineral exploration and waterwell sectors or waterwell construction. * Waterwell contractors will also require a card/licence issued by Government or industry organisation. The Waterwell card or licence must identify a Class of licence (Class 1, 2 or 3).
Drilling Rig Operators - DIRECTIONAL DRILLING	utilise rigs with a steerable system to positively change the borehole direction and angle in a range of contexts. Guided boring is a steerable system for the installation of pipes, conduits and cables or other services. In the trenchless technology sector, horizontal directional drilling is similar to guided boring.
SONIC Drilling Rig Operators	utilise rigs with rapidly vibrating drill casings and rods to pulverise or liquidise formation for shallower site investigation or sampling, for undisturbed samples for geological, environmental, archaeological, and seismic information
Dogman	An assistant to a crane operator, responsible for securing the crane's load and directing the operator.
Dump Truck	A dump truck operator drives large trucks that transport and dump waste materials like sand, gravel, rock or non-degradable garbage. a large truck for transporting heavy loads, with a back part that can be raised at one end so that its contents fall out, whereas a side dump truck (SDT) consists of a 3-axle tractor pulling a 2-axle semi-trailer. It has hydraulic rams which tilt the dump body onto its side, spilling the material to either the left or right side of the trailer.
Dump Truck NSW	Does the same work as a Dump Truck driver, however may work on a restricted licence as per the requirements of NSW regulator Safework
Tip Truck	This is a similar description to a Dump truck but is generally used for longer hauls outside of the work site and therefore road registered.
