Nat Comp Codes	Plant operator competencies - can hold any one or more																							
TLIW2028	Identify the principles of ballast cleaning operations																							
TLIW2029	Identify the principles of ballast regulator operations																							
TLIW2030	Identify the principles of dynamic track stabiliser operations																							
TLIW2031	Identify the principles of self-propelled rail grinder operations																							
TLIW2032	Identify the principles of tamping machine operations																							
	Competency requirements (conditional by operator)																							
	Level 3: AHCCHM304A Transport, Handle and Store Chemicals										C													

Notes:
M* = Must hold the Please ensure you also comply with the local government licencing requirments in your state http://www.chemcert.org.au/State_legislation.html
* = Must hold Workcover / Worksafe High Risk License for Task.
(1) = Must hold the appropriate trade or licence for tasks being conducted.
(2) = Must hold one of the UOC depending on machine size i.e. over/under 10T.
= Conditional operator requirement.
The information contained in this matrix is a guide and for reference only, it is not an exclusive list. This could be subject to change from the Rail Transport Operators.

National Track and Civil Matrix

Role examples (A-Z)

NOTE: These are to be used as a guide only. If you are unsure which role applied to you, please seek clarification from the operator with whom you propose to work as to what role is required for your intended duties. It is the individual's responsibility to ensure that

Role	Examples
Around The Track Personnel (Construction/Maintenance)	This role is used when undertaking rail safety work within a rail construction zone in the rail corridor. This role is used for the following types of workers in the rail corridor: Graffiti Removal, General Civil Labouring / Maintenance activities outside the Danger Zone (equivalent to the general civil construction labourer), Apprentices/Trainees, Engineers/Project Managers etc required to access the rail corridor (they must also hold their Engineering/Project Managers RIW role), Surveyors, Tractor Operators, Truck Drivers and Water Cart Operators.
Around The Track Personnel (Non-Construction/Maintenance -Other)	This role is used when undertaking rail safety work not considered to be part of a rail construction zone in the rail corridor. Auditors (inc Safety), Cleaners, Customer Service Agents (inc Platform Coordinators); Environmental Officers, ie. Arborist or Ecologist, Photographers, Operational roles such as Drivers, Network Operations Supervisors; Planners; Property type roles (selected); Safety Officers or Security Guards.
Ballast Unloader	Requires the skills and knowledge to carry out ballast unloading.
Rail adjuster	Adjust rail in accordance with safeworking and regulatory requirements and workplace procedures. It includes identifying and determining the requirements for rail adjustment, undertaking rail adjustment, and completing all required documentation.
Rail Grinder - Rail only	Is a person who grinds rail welds and faults. It includes determining job requirements, grinding weld and/or weld repair, grinding rail to repair surface defects, and completing all required documentation.
Rail Grinder - Switches and Crossings	Is a person who grinds switches and crossings to repair welds and repairing of surface profile of switches and crossings in service.
Rail Labourer	This is a generic labouring role for those working in the Danger Zone on or about the track, ie. Rail Clipping, Rail Laying, Re-Sleepering. Individuals holding this role would normally work under the supervision of specific Track Worker roles, like Track Maintainers.
Rail Lubricator	Requires the skills and knowledge to install and service rail lubrication equipment, install lubrication equipment, servicing and monitoring, removing lubrication equipment, and completing all required documentation
Rail welder (Aluinothermic)	Rail welder encompasses several roles including: aluminothermic, flashbutt, and Hedkote. This category also includes heat & cut materials using oxy-LPG equipment
Rail welder (Electric)	Rail welder encompasses several roles including: aluminothermic, flashbutt, and Hedkote. This category also includes heat & cut materials using oxy-LPG equipment
Rail welder (Flashbutt Welding)	Rail welder encompasses several roles including: aluminothermic, flashbutt, and Hedkote. This category also includes heat & cut materials using oxy-LPG equipment
Track Certifier	The Track Construction Certifier must be able to identify and measure both scope of work and quality of track construction work. Requires the knowledge and skill to identify the relevant construction specification and determine whether the track meets that specification and standard. It includes knowledge of the Inspection and Test Plan processes and to understand when hold points and witness points are required. In addition the certifier needs to know the maintenance standards for the track so that any outstanding work can be defined with the appropriate train operating restriction until all remedial work is completed.
Track Constructor	Requires the skills and knowledge to implement construction activities including planning work, implementing construction, dealing with maintenance and construction problems.
Track Examiner	Examine track and right of way infrastructure including preparing for examination, examining track and right of way, analysing examination results, and reporting findings.
Track Maintainer	Implement track maintenance, conduct mandatory systematic inspection, examination, condition monitoring and functional checks on the rail infrastructure and take appropriate action to ensure rail infrastructure is in a safe operational condition, including recording and reporting of defective infrastructure to maintain a valid defect recording system.
Turnout Constructor - Concrete	Requires the skills and knowledge to implement turnout construction activities including planning work, implementing construction, dealing with maintenance and construction problems.
Turnout Constructor - Timber	Requires the skills and knowledge to implement turnout construction activities including planning work, implementing construction, dealing with maintenance and construction problems.
Ultrasonic Tester Track	Involves test plain rail and field welds using ultrasonic equipment. It includes determining test requirements, conducting testing using hand directed equipment, conducting visual examination and measurement of welds, identifying and classifying defects, and completing all required documentation.
Ultrasonic Tester Turnouts	Includes above role requirements as well as: test switches, crossings and other special components in turnouts using ultrasonic and other non-destructive testing equipment. It includes determining test requirements, conducting ultrasonic testing using hand directed equipment, and conducting non-destructive testing.
Vegetation Controller	Controlling vegetation through the application of herbicides or other means.

National Track and Civil Matrix

Currency Requirements

NOTE: These are to be used as a guide only. If you are unsure which currency period applies to you, please seek clarification from the operator with whom you propose to work. It is the individual's responsibility to ensure that the appropriate currency is held before work is carried out.

Roles with currency requirements	Comments
Rail Bound Plant Operator	TfNSW - 2 years (TLIC2058A)
Rail Welder (and other roles that include the following units)	
Heat and cut materials using oxy-LPG equipment for the rail industry	ARTC/Queensland Rail/V/Line - 2 years
Weld rail using aluminothermic welding process -	ARTC/Queensland Rail/V/Line - 2 years TfNSW - 1 year
Carry-out electric welding process to rail	ARTC/Queensland Rail/V/Line - 2 years TfNSW - 1 year
Weld rail using flashbutt welding process carry-out electric welding process to rail	ARTC/Queensland Rail/V/Line - 2 years
Track Certifier and Track Examiner (and other roles that include the following units)	
Check and repair track geometry	ARTC/TfNSW - 2 years
Examine track infrastructure	ARTC/TfNSW - 2 years
Visually inspect track infrastructure	ARTC/TfNSW - 2 years
Adjust rail	ARTC/TfNSW - 2 years
Patrol track	TfNSW – 2 years
Maintain and certify track	TfNSW – 2 years
Maintain and certify turnouts	TfNSW – 2 years
Examine structures	TfNSW – 2 years
Structures assessment	TfNSW – 2 years
Vegetation Controller	Metro/V/Line - 5 years
Ultrasonic Tester Turnouts	TfNSW - 1 year
